The Teacher's Enterprise

Why you need a teacher's enterprise?

Online learning is not a new thing and the pandemic has already accelerated it.

But how to make it more engaging and entrepreneurship driven , keeping everyone involved and be safe?

	2016	↑ CAGR	2021P
Online education market	247	↑ 52%	1964
Primary and secondary supplemental education	73	↑ 60%	773
Test preparation	43	↑ 64%	515
Reskilling and online certifications	93	↑ 38%	463
Higher education	33	↑ 41%	184
Language and casual learning	5	↑ 42%	29

Online primary and secondary supplemental education will be driven by the increased acceptance of the online channel among the target customers and increased internet penetration in tier 2 cities and beyond.

Test preparation will be the fastest growing category in online education for the next five years. This growth will be an outcome of high adoption of online channel amongst the students and an increase in the number of competitive exam aspirants.

Online higher education will also witness a considerable growth and continue to aid in distance learning programs.

Skill development and enhancement requirements for the working population will lead to growth in the reskilling and online certifications market.

Online language and casual learning will grow driven by growth language learning, but paid adoption is likely to remain limited.
